GALORE REPORTS TASEKO PROJECT DRILL RESULTS

Vancouver, BC: Galore Resources Inc. (**GRI-TSX.V**) announces results from a two-hole diamond drilling program totaling 800 metres on the company's Taseko property in southwestern B.C.

The drilling program targeted porphyry copper-molybdenum mineralization on the Hub prospect, located on the company's 43,700-hectare Taseko Project, near Williams Lake, B.C. The road-accessible Hub prospect is located approximately 20 kilometres south of Taseko Mine's Prosperity project, which is reported to be one of Canada's largest undeveloped copper-gold deposits.

The two recent holes were drilled 175 metres southwest of a five-hole mineralized section, drilled in 2008. The previous mineralized intercepts included: 137.2 m of 0.14% Cu, 0.009% Mo and 41.5m of 0.20% Cu, 0.013% Mo in hole 08TSK-03; 53.3 m 0.12% Cu, 0.011% Mo in hole 08TSK04 and 96.8 m of 0.19% Cu, 0.009% Mo in hole 08TSK06.

Mineralization at the Hub prospect consists of strong, quartz-sulphide stockwork, hosted by altered, multi-phase intrusive and volcanic rocks and is open in all directions and at depth. The dimensions of the porphyry system are interpreted to be approximately 2 kilometres by 3 kilometres, based on an airborne magnetic anomaly. The limits of the mineralization have not been defined.

SUMMARY OF 2009 ANALYTICAL RESULTS

Hole		From(m)	To(m)	Interval (m)	Cu %	Mo %	Au ppm
09TSK-13	Hole Average	18.5	398.7	380.2	0.093	0.0076	0.0165
09TSK-13		79.8	137.0	57.2	0.100	0.0036	0.0182
09TSK-13	including	79.8	92.0	12.2	0.104	0.0047	0.0112
09TSK-13	and	111.5	120.5	9.0	0.111	0.0022	0.0250
09TSK-13	and	123.5	137.0	13.5	0.116	0.0034	0.0208
09TSK-13		174.5	186.5	12.0	0.117	0.0034	0.0175
09TSK-13		215.0	329.0	114.0	0.135	0.0088	0.0275
09TSK-14	Hole Average	12.0	399.0	387.0	0.087	0.0058	0.0084
09TSK-14		15.0	51.0	36.0	0.106	0.0064	0.0069
09TSK-14		127.5	139.5	12.0	0.100	0.0068	0.0094
09TSK-14		171.0	228.37	57.37	0.123	0.0081	0.0108
09TSK-14	Including	185.9	208.5	22.6	0.143	0.0079	0.0124
09TSK-14		249.0	261.0	12.0	0.081	0.0196	0.0106
09TSK-14		265.5	307.5	42.0	0.120	0.0054	0.0084

"We are encouraged by our 2009 drill results from the two step-out holes which expanded the limits of copper-molybdenum mineralization on the Hub prospect. These results indicate that mineralization is open in all directions and has excellent potential for expansion as only a small fraction of the Hub target has been drilled" said Michael Byrne, president of Galore.

Uwe Schmidt, P.Geo., Vice-President Exploration and Galore's Qualified Person as defined by Canada's National Instrument 43-101, is responsible for supervising the Taseko program and has verified the technical data in this release.

Galore Resources is a British Columbia-based exploration company that has assembled a leading group of industry professionals to acquire and explore for promising deposits with an emphasis on gold in Mexico and base metals in British Columbia.
