

Omnicity Set to Deploy Motorola Gear in Major Build-out

Rushville, Indiana – June 1, 2010 - Omnicity Corp (OTCBB: OMCY), the Midwest's largest and fastest growing fixed wireless broadband service provider, announced its intention to roll-out Motorola's Wireless Networking Solutions product line into its build-out of acquired WISP assets and in aggressive market expansions throughout Indiana and Ohio. Omnicity has completed 10 acquisitions since February, 2009, driving subscriber counts to over 12,000, a 600% increase in that period. David Bradford, COO of Omnicity said of the Motorola Canopy[®] deployment, "Our aggressive acquisition path since February last year has not only delivered to us 10,000 additional subscribers and positive operational cash flow, it has left us with a network that reaches over 400,000 homes within the footprint of our towers to market into, not to mention the several hundred thousand homes which are outside of our current footprint. Using the high performance and high capacity of Motorola's Wireless Networking Solutions products, our goal is to maximize market penetration within these 400,000 homes and to build-out and expand service into as much more of rural and small market Indiana and Ohio as possible. This Motorola Canopy[®] system equipment is robust, powerful, and reliable. Omnicity intends to deploy this equipment in rural America as aggressively as possible where there is either no internet service or a lack of good internet service."

About Motorola Canopy[®]:

Motorola Wireless Networking Solutions offers a wide array of products designed for extending networks wirelessly to provide broadband services for virtually any customer in virtually any environment. These systems provide wireless Ethernet connections which can be used to transport voice, video and data in channelized or unchannelized formats. Modules are available to support Line of Sight and Non-Line of Sight point-to-point connectivity and point-to-multipoint last mile access solutions. With a broad array of broadband products, these systems can be configured to meet the current and future needs of business and residential network users.

The Motorola Canopy[®] system is the ideal technology for developing, enhancing and extending advanced broadband networks and services - and for making delivery of high-demand technologies like Internet access, voice over IP, video services, and security surveillance both much quicker and much less expensive. Motorola Canopy[®] broadband technology combines field-proven toughness with exceptional performance, security, ease-of-use and cost effectiveness. Available in frequencies from 900 MHz to 5 GHz, with an array of options and accessories, Motorola Canopy[®] systems can be designed to make your business case a success.

About Omnicity:

Our vision is to be the first broadband service provider to expand its network across rural America

Omnicity Corp is a public company based in Indiana providing broadband access, including advanced services of voice, video and data, in un-served and underserved small and rural markets and is planning to be the premier consolidator of rural market broadband nationwide. Omnicity's strategy is to provide a total broadband solution and continue rapid growth through acquisitions of networks and subscribers, organic growth and continue to partner with Rural Electric Membership Co-ops and Rural Telephone Companies. Omnicity has an experienced broadband operations team with extensive wireless broadband/ISP expertise as well as the expertise to consolidate large numbers of networks and subscribers through its roll-up strategy.
