

HDX Launches Dexit Payment Solution with Integrated Touch Screen Point of Sale system at MTC plant in Whitby, Ontario

Toronto, Ontario – Nov 2, 2007 - Hosted Data Transaction Solutions Inc. ("HDX") is pleased to announce the deployment of the Dexit Payment Solution integrated with the HDX touch screen Point of Sale (POS) solution at the Manufacturers Technology Centre ("MTC") in Whitby Ont.

HDX (formerly Dexit Inc.) is listed on the TSX under the symbol HDX.

The MTC plant in Whitby is the largest Sony Service Depot in Canada and has recently introduced a new cafeteria for its employees. The cafeteria is a joint project with the Canadian Mental Health Association (CMHA) who is operating the cafeteria inside the MTC facility.

The Dexit Payment Solution offers MTC employees a convenient and fast way to pay at the cafeteria. The solution is privately branded for MTC with a web site that allows employees to view transactions, opt in for useful email alerts (ie. account balance) and set automatic refill preferences.

The integrated HDX touch screen POS solution offers exceptionally fast and simple cashier operation allowing for faster customer throughput and heightened transaction accuracy. Faster customer throughput and reduced queues allow MTC employees more time to enjoy their meals.

The CMHA, as operator of the cafeteria, is extending its outreach program to the MTC plant cafeteria by offering community employment opportunities to individuals that require support. Through working at the cafeteria the participant receives valuable training and work experience with the goal of ultimately providing the tools and confidence to work full time in a similar setting.

"We are proud to have been selected to help the Durham community, the CMHA, and the MTC, make this very worthy project a success" says Paul Howell, President and CEO of HDX. "Integrating the Dexit Payment Solution and HDX Touch Screen POS system provides cafeteria cashiers with advanced technology while simplifying and expediting transactions. Through their partnership, MTC and CMHA have certainly created a win / win situation for operators and consumers. We are gratified that our closed loop, private branded, fully integrated business model resonates so well with our customers".

"It has been a pleasure working with everyone at Dexit. We are thrilled with how easy the system is to use," says Marni Bell, Team Leader, Employment, Durham CMHA.

About CMHA Durham

The CMHA envisions a community in which individuals are valued and respected. The community is a diverse accepting one, mobilized to empower all residents. CMHA strives to nurture and promote that healthy community. CMHA's mission is to promote and enhance the mental and emotional well-being of the residents of Durham Region. In its work CMHA-Durham strives to:

- Provide a range of responsive programs in an atmosphere of mutual sharing;
- Educate the wider community regarding mental health issues;
- Develop and operate community-based mental health programs for people requiring support;
- Work closely with other related services in the community;
- Participate in developing other suitable programs in the community.

About MTC

MTC is the largest SONY service depot in Canada and it repairs more than three thousand units per month at the Whitby Ont location. MTC specializes in repairs, sales and support for manufacturer programs while operating under the SONY Canada guidelines and conforming to ISO 9000 standards.

About the Company

HDX is in the business of managing merchant transactions with consumers and facilitating payment emphasizing transaction speed, simplicity, and accuracy. HDX develops and deploys touch screen POS system software and associated enterprise management tools and has developed and deployed numerous POS applications. HDX also provides system hardware integration services, merchant staff training, system installation services, and post sale software and hardware support services. Leading edge technology also includes customer self serve kiosks and "line buster" mobile point of sale terminals. These products have been designed to dramatically enhance customer throughput and drastically reduce customer queues. These technologies are especially effective in high foot traffic environments that have limited cash register counter space, limited retail square footage, and the absence of a drive through.

HDX has pioneered an "instead of cash" ® electronic based payment facilitation service. The Dexit® Prepaid Payment Service can be private branded for a specific merchant and enables customers to pay for items quickly and conveniently with the tap of a RFID (radio frequency identification) tag linked to a pre-paid account. The Dexit payment solution is especially well suited for corporate and institutional cafeteria environments where hundreds of customers purchase and pay for meals in compressed periods throughout the business day.
