**Greencastle Begins Drilling in Southwestern Saskatchewan**

Greencastle Resources Ltd. (“Greencastle,” or the “Company,”) is pleased to report that the first well has been spudded on lands in the Boggy Lake-Cabri Area where the Company has a farm-in agreement with Centaur Resources Ltd., 611890 Alberta Inc., and Bellport Resources Ltd. (Centaur et al). Drilling by the operator, Centaur, should finish in about five days with completion and testing operations to follow where required. Immediately following drilling the first well, the rig will be moved to the second location.

The farm-in agreement covers 12 sections of land in the Boggy Lake-Cabri Area, in Southwestern Saskatchewan. By drilling these two test wells, Greencastle will earn a fifty per cent working interest in a total of six sections.

The primary objective for the drilling is to test for medium gravity oil in the Upper Shaunavon and Mannville formations.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release. This news release includes certain “forward looking statements” within the meaning of the United States Private Securities Litigation Reform Act of 1995. Without limitation, statements regarding potential mineralization and resources, exploration results, and future plans and objectives of the Company are forward looking statements that involve various degrees of risk. The following are important factors that could cause the Company’s actual results to differ materially from those expressed or implied by such forward looking statements: changes in the world wide price of commodities, general market conditions, risks inherent in exploration, risks associated with development, construction and mining operations, the uncertainty of future profitability and the uncertainty of access to additional capital. The Company relies on litigation protection for forward looking statements.
